

## The U. S. Food Administration Asks

the circulation of recipes providing for the use of corn and other coarse flours to save wheat for our allies.

## The Calumet Baking Powder Co. Complies

with a new War-Time Recipe Book, containing scores of splendid new recipes, compiled especially to meet war-time economy demands.

## The U. S. Food Administration Writes

under date of February 6th, the letter coming from the Home Economics Division, as follows:—

"Every woman who provides for her family can help win the war by the wise and careful use of wheat, meat, fat, dairy products, and sugar:—

"By using other fats for butter in cooking; Other cereals for part of the wheat in bread; Other meats, such as game, fish and poultry, or eggs and cheese, to reduce the demand for beef, pork and mutton.

"The recipes in this book have been revised to meet these rules, and the woman who uses them will be doing her part in helping to conserve our food supply."

Use Calumet Baking Powder in all War-Time recipes.

## DRUGGISTS WILL FIGHT CHARGES MADE BY COUNTY

Sale of Goods Containing Alcohol and Keeping Such Goods In Stock, Is Basis of Several Charges

Charged with disposing of intoxicating liquor or being proprietors of places where liquors were sold, eight of the leading druggists of the city were arrested yesterday, among the number being George N. McBean and J. A. Jones, members of the city commission.

Armed with search warrants, deputies of the sheriff's office and representatives of the Thiel detective service who have been investigating the cases for the past month, made the rounds of the drug stores early yesterday morning. The search resulted in eight and a half cases of Jamaica ginger, registering from 99 to 98 percent alcohol and two cases of Peruana, being confiscated and those against whom warrants were served were George N. McBean and G. H. Durkee, Capitol Pharmacy; J. A. Jones, A. L. Boehmer and Robert Burns, Adams Pharmacy; C. D. Dunn, Busy Drug Store; E. C. Mason, Mason's Pharmacy; and H. H. Hunter, Hunter's Drug Store. Bail in the sum of \$1,000 was furnished in each case and arraignments will probably be held this morning if the county attorney can arrange the time.

The only sensational feature of the wholesale arrests took place in the Busy Drug Store when Hugh Walker, detective, was assaulted by C. R. Dunn when he asked the druggist where he kept his grain alcohol. His glasses smashed, his eye bruised and his forehead cut, the detective felt the effects of his encounter for many hours after he was injured. He intimated that a charge would be made against Dunn.

According to Walker, the officers and detectives agreed to make the rounds at the same hour and when he and a deputy arrived at the Busy Drug Store at 8:45 o'clock, they found that Dunn had not yet arrived. They went to his home and he accompanied them back to town. In the machine Walker and E. J. Warren, deputy sheriff, explained the charge against Dunn and notified him that they had a search warrant. He offered no objection, but when Walker asked the whereabouts of the alcohol, he was struck by Dunn, the blow smashing his glasses.

"I haven't any grain alcohol and haven't had since prohibition went into effect," Dunn is alleged to have said. Walker disputed the fact, mentioning the name of a clerk who is not now in town, from whom he procured it.

"You are a liar," Dunn is charged with saying and at that dealt him a blow that rendered him semi-unconscious.

Walker stated that from February 11 to March 25 he has been gathering data for the county attorney in bootlegging and gaming cases. Speaking of one particular case he said he had "nothing on" George McBean until March 25.

He claimed before that time his men had attempted to procure Jamaica ginger there but had failed until A. D.

## TWO GALA DAYS FOR PHOENIX COMING DURING APRIL

Two days of the calendar of activities in Phoenix for next week read as follows:

Thursday, April 18, Visit of Secretary McAdoo.

Friday, April 19, Circus. When Secretary McAdoo comes to Phoenix on April 18 he will arrive in a private car which will be fitted up as an office in order that the secretary, who in addition to being the directing head of the Third Liberty Loan, is director of all the railroads of the country, may conduct the business of the latter during his trip.

It was suggested yesterday at the office of the corporation commission that during the visit in Phoenix of Mr. McAdoo it would be a splendid opportunity for that official to see for himself what sort of depots this city is afforded, especially in view of the statement that when the government takes over the railroads at the conclusion of the war all city ticket offices in cities of 100,000 and less will be abolished and the business conducted at the depots.

"I have not heard what arrangements have been made for the reception and entertainment of Secretary McAdoo when he comes to Phoenix on April 18," said F. A. Jones, chairman of the corporation commission, yesterday. "but I should think it would be a great chance to show the secretary how badly this city needs a new depot. The program, which I have been told has already been tentatively prepared for the time when the government takes over the railroads, includes the abolishing of all city railroad offices in cities of 100,000 and less, the business to be transacted at the depot offices. While in Washington recently I suggested that the depots in Phoenix hardly would be suitable for such a purpose, and it was immediately stated that we would then have to have new depots, pretentious enough for the purpose."

"With Secretary McAdoo coming to Phoenix next week, it is my impression that the matter of a visit to these depots should not be overlooked by the committee in charge of his entertainment."

Tucker, detective, was introduced by Hayes Calvin Rex and after that had no difficulty in securing what he wanted. Rex was yesterday given a sentence for bootlegging.

When Sheriff Willy and Deputy Sheriff Charles Nafzinger read the information against him to one of the druggists, he remarked that it was no more than he expected. He declared that he welcomed the action of the officers for the druggists would now know just what they could sell.

"We don't know where we stand," he said. "We have toilet water in stock containing as much as 75 per cent alcohol yet we are permitted to dispose of that. McLean's Strengthening Cordial contains more alcohol than the law allows, yet there has been no complaint against that. When the edict was issued against Port Olive, we discarded that—the thing we wish to know is what can and what can't we have in stock."

Jamaica ginger appears to have been drunk openly at some of the soda fountains and no account taken by those in charge.

## NON-ESSENTIALS MUST AWAIT END OF WORLD'S WAR

Corporation Commission In Receipt of Instructions from War Industries Board of Most Drastic Import

No unnecessary construction, no useless building, no forming of industrial companies that do not aid the government in the prosecution of the war, no use of capital, labor or materials that do not directly or indirectly help the country at this time in the winning of the war.

These are part of the instructions received yesterday by the corporation commission from the War Industries Board in Washington with directions to make them as public as possible that the people may become thoroughly familiar with the wishes of the board and not attempt to run counter to the board, a practice which will bring grief to such parties, the board plainly declares.

"The instructions from the War Industries Board," said F. A. Jones, chairman of the corporation commission, yesterday, "set forth the necessity for the limitation of capital expenditures for either public or private undertakings not essential to and not contributing either directly or indirectly toward the winning of the war. The corporation commission," added Mr. Jones, "is going to ask the people to act heartily and wholly in accord with the instructions of the war board so that an order from the corporation commission will be unnecessary."

The resolution of the war industries board received yesterday by the corporation commission is as follows:

"Whereas, it has come to the notice of this board that new industrial corporations are being organized in different sections of the United States for the erection of industrial plants which cannot be utilized in the prosecution of the war, and

"Whereas, plans are being considered by certain states, counties, cities and towns for the construction of public buildings and other improvements which will not contribute toward winning the war, and

"Whereas, the carrying forward of these activities will involve the utilization of labor, materials and capital urgently required for war purposes, "Now, therefore, be it resolved, by the War Industries Board, that in the public interest, all new undertakings not essential to and not contributing either directly or indirectly toward winning the war, which involve the utilization of labor, materials and capital required in the production, supply or distribution of direct or indirect war needs will be discouraged, notwithstanding they may be of local importance and of a character which should in normal times meet with every encouragement.

"Be it further resolved, that in fairness to those interested herein, notice is hereby given that this board will withhold from such projects priority assistance, without which new construction of the character mentioned will frequently be found impracticable, and that this notice shall be given wide publicity that all parties interested in such undertakings may be fully apprised of the difficulties and delays to which they will be subjected, and embark upon them at their peril. "The War Board requests your hearty co-operation in the interests of the people of the United States."

**PIGEONS ASKED FOR**  
(The Pathfinder)

The city of Baltimore has been asked to furnish 2,000 homing pigeons for military use in France. These birds are invaluable for army service, being able to carry messages under conditions which would prevent the employment of the telephone or wireless. Over 90 per cent of the messages sent out by carrier pigeons arrive safely at their destinations, it is said.

## FOUR IMPORTANT REQUESTS MADE

Four applications, all closely related, were heard yesterday by the state corporation commission and submitted for later decision.

The Arizona-Hercules Copper company had made a complaint against the Ray Consolidated Copper company, alleging failure to render electrical energy service.

The Ray and Gila Valley railroad company made an application for permission to purchase from the Ray Con the yards and other properties at Ray and to issue stock in payment therefor.

The Ray Consolidated Copper company asked for permission to sell the electric and telephone properties of the company to the Ray Electric and Telephone company.

The Ray Con made application for an order relieving that company from the obligations of a public utility.

## SEE A FISH PICK IT UP, ALL DAY LONG HAVE GOOD LUCK

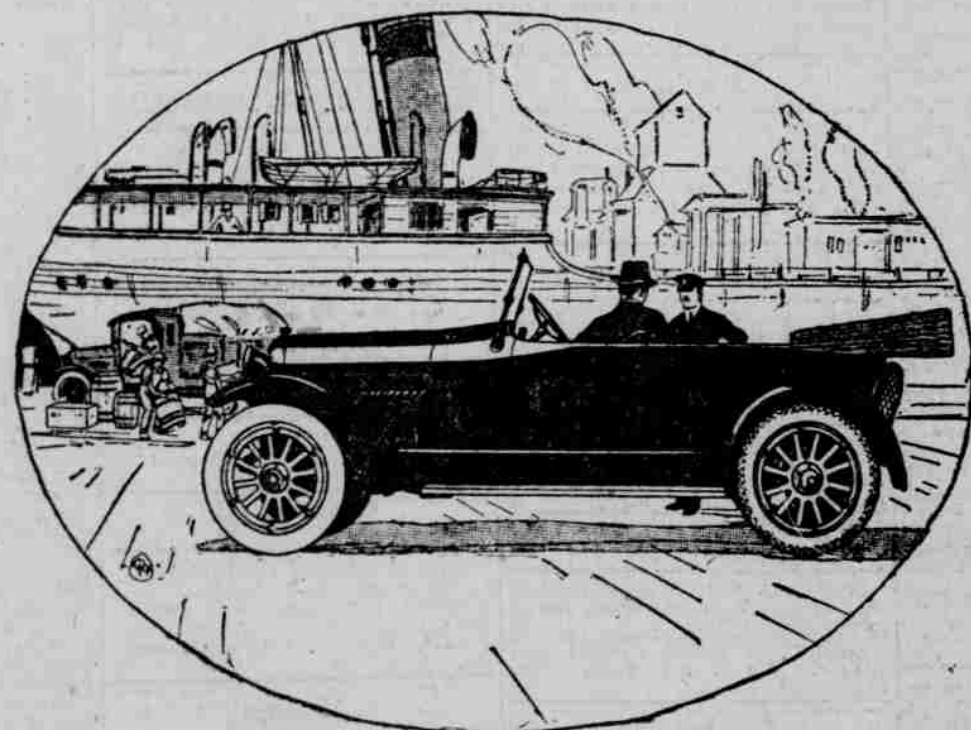

G. M. Willard, state game warden, gravely thumbed the statutes of Arizona from front to back and back to front. Finally he looked up from the book:

"I find nothing here that seems to fit your case," that official announced to two men who were standing by his desk in his office at the state house. "There seems to be no law against the picking up of fish," the game warden declared, even though you had no license.

warden spoke seemed to be relieved at the announcement and turned to leave. They had been brought to the office of the state game warden by a deputy warden who had interrupted them as they were picking up nice large fish that had been stranded on the banks of the Salt river.

The water of that river had been completely turned off above the diversion point and the fish were left high and dry waiting for the first person who came along. The deputy game warden who made the arrests admitted that he didn't know what to do with the case and turned it over to his chief. The two men were sent on their way.

"It is nothing unusual for people to pick up fish in this manner," said Mr. Willard. "Frequently the fish get down the canals and into alfalfa fields where they are stranded when the irrigation water is absorbed. It has been suggested by several people that the canals be screened to prevent the fish from getting into the fields, but that would cost more than all the fish are worth."

## PAIGE

The Most Beautiful Car in America

**EFFICIENCY**—that is the watch-word of today. It means speed. It means the elimination of all waste in time and effort. It means the co-relation of brain and muscle in making each minute a productive minute.

If we are to win the Great War, we must introduce this doctrine into every phase of our daily life. As a nation, we must learn to challenge each tick of the clock and insist that it register Action.

In this connection, please remember that the automobile is one of the most efficient Time and Labor saving devices that has ever been developed. It has become the pace-maker of modern progress and to eliminate it would mean to turn back the calendar a quarter of a century.

In every profession and every field of business you will find the motor car performing its work with economy and dispatch.

It carries thousands of executives to and from their offices each day. It permits them to keep appointments on the dot. It multiplies their usefulness and broadens their scope of activities like no other form of transportation.

So, by all means, buy a motor car—but get a good one while you are about it. Look for a manufacturer's reputation rather than four wheels and a painted body. Look for enduring quality—that is all we ask—and you will be led irresistibly to the Paige.
